

Company Overview

The core focus of Janata Wifi is on enhancing internet connectivity and digital services by working with the key stakeholders such as ISPs. Also, we work on business automation for mid to large-size enterprises. Partnering with industry leaders such as Microsoft, Google, and AWS, we provide a range of Business Intelligence, Traditional RPA, and AI-driven automation services that enhance user experiences and enterprise efficiencies. We have implemented automation telecommunication networks, and financial institutions to automate customer communication and investment decisions.
