CCPL

COLOR
MULTI-PATH

Multiple clipping path service is needed for it can also be used for multiple texture, color adjustment, shadow effect, style addition, photo manipulation etc

INVISBLE MANNEQUIN

If we are talking about apparel business, ghost mannequin technique is a must. It is needed for show casing the products in a more appropriate way. Ghost mannequin is the process of removing the model or mannequin from the image to give it a perfect look. This process is also known as invisble mannequin, 3D mannequin, hollow man, composite insertion, 3D neck joint and simply neck joint.

Invisble mannequin effect is an art which allows the removal of mannequin and background to give a hollow look.

SHADOW CREATION

Shadow creation is a modern technique to engage your customer toward your product on an e-commerce website. Shadow creation, alternatively known as image shadowing to make the image more enchanting and realistic. Image with absolutely no shadows will look naked to your eyes. That is why shadow creation has been an important issue in image showcasing. There are mainly three types of shadows are used wisely.

PHOTO RETOUCH

From a highly skilled photographer to enthusiast shutter bugs, none can shoot every click a master piece rather perfect photos are created. There must be some anomalies on the image that whould hamper the photo quality. Thats why image retouching technique evolved. Image retouching is the technique of editing an image to give it a perfect look.

BEFORE

AFTER

JEWELRY RETOUCH

Photography has been rushed by the strong demand and the necessity to fix the image quality through image editing process due to the continuous development of modern technology. When jewelry photoshoot for advertising, the jewelry product images go under the loupe for alteration.

Jewelry photo retouching is a classy modification which refers to superior quality tweaking for a glittering look. It aims is to make stylish jewelry items such as rings, earrings, bracelets, necklaces, pendants or brooches photo more eye-catching.

COLOR
CORRECTION

Color correction service improves the overall look of an image. As the photo-shoot using high end gadget can provide exact tone and feel of the color, then it is done manually using the service.

HAIR MASKING

Most of the time it enables users to adjust and tweak the mask leter if necessary. Image masking is an efficient and more creative way of the image manipulation services. There are three types of masking. Layer Mask, Clipping Mask, Alpha Channel Mask.
IMAGE MASKING

Applying the technique for masking images in photoshop, an expert can take a complex image away in a sensitive way to yield an improved image. When implementing clipping path photoshop does not bring the desired result, this method shows a better result.

E-COMMERCE POST PRODUCTION

Generating a bounty of profit from an eCommerce site depends on the top-notch quality of the products' images available in an online store. For that, you need the best ecommerce photo editing service provider to deliver an attractive presentation for your products.

Great quality and the feature are important for a sustained business in an ecommerce site but it becomes ineffective in generating sales at the beginning. Even both ecommerce SEO and digital marketing have less value.

3D RENDERING

3D rendering is the 3D computer graphics process of converting 3D models into 2D images on a computer. 3D renders may include photorealistic effects or non-photorealistic styles.

3D MODELING

In 3D computer graphics, 3D modeling is the process of developing a mathematical representation of any surface of an object in three dimensions via specialized software. The product is called a 3D model.
