Brand Story

Techno Safety is an innovative company in the sector of It-based digital solutions, providing hardware and software solutions for the security purpose for private and public sectors including defense forces. Our solutions include hi-tech security surveillance, personal information protection, intellectual property data theft protection, government and industry information systems protection, and more forstand-alone, network, and cloud platforms.

Vision

Excellence and leadership in the Banks, Financial institutes, Security agencies, Public Administration, Finance, Telecommunication, Industry, Media & Entertainment and Commerce fields of IT solutions and cybersecurity at the regional and global level. Ensure commitment to effectively meet the needs of the clients. Techno safety will become an integral part of its client's success, collaborating with them to achieve their strategic objectives whilst creating long lasting business value through the delivery and management of their technology with full proof security.

Mission

To be the global leader in all sectors of IT solutions and Cyber Security Services. Building on our technologies, competencies and customer interests, and creating value for our stakeholders and customers. We'll achieve this by focusing on the intersection of our client's emerging needs and the acceleration of business and technological change. We reduce the vulnerability of the digital environment implementing combined cyber-security and cyber-defense systems that neutralize advanced threats, thereby contributing to the improvement of security and technical solutions for all.

Problem

- The information age brings new threats on both international and local levels
- Our children have increasingly exposed to the cyber world, and more unique forms of harassment appear that parents, teachers, and guardians need to be aware of
- data and information are threatened in the way of smaller scale scams like identity theft and mobile-banking hacks as well as larger-scale attacks like the 2016 Bangladesh Bank cyber heist.

Goal

To ensure digital safety of around 500 private companies, 100 banks, 50 government agencies, 100 educational institutions including schools, college and Universities.

Target Customer

- Banks
- Government agencies
- Education institutions
- Individuals

Core Values

- Well Researched solutions
- Giving priority to customers need
- Quality service and secured transactions

Services:

- **IT CONSULTANCY:**
On-site support. Our resources will be available to work at your offices or remotely. Training of company personnel on cyber security issues. We can manage your in-house team in outsourcing.
- **TECHNICAL SUPPORT:**
We are always at your disposal to help you solving problems. We guarantee maximum availability and presence, prompt responses and quick and effective solutions.
- **SOFTWARE DEVELOPMENT:**
We develop web applications using an Agile workflow. We develop replicable and scalable infrastructures using Infrastructure as Code techniques. This technique allows you to create virtual infrastructures through programming language, making them highly replicable. This results in a significant reduction in provisioning time, cost savings, and a significant reduction in risk and human error.
- **SECURITY:**
We perform infrastructure Security Assessments, Vulnerability Assessments, Penetration Tests and Network Security infrastructure design. We can also help companies comply with the GDPR and implement solutions to ensure system integrity,

availability, resilience, and timely recovery in the event of a physical or technical accident.

- **CONTINUOUS MONITORING:**

We design and implement Monitoring and Cyber Security solutions. We are experts in NOC & SOC services. We can create the infrastructure that will ensure the continuous delivery and availability of your services and the highest protection from cyber-attacks. We will be able to monitor service availability, performance, breaking point of your sites, creating automatic responses to abnormal events able to restore services in an automatic way.

- **SYSTEM INTEGRATION:**

We help our customers by proposing the integration of new scalable systems and platforms. This process allows us to build an architecture tailored to the specific needs of the customer, increasing the efficiency of the systems, decreasing costs and service delivery times without sacrificing security.

- **CLOUD:**

We use the best services available on Cloud Computing platforms, ensuring high performance, speed, reliability and scalability, at the best cost ratio. Our goal is to offer you the most effective solutions for your needs, at the best cost, ensuring security, rapid service delivery and continuity of service

- **NETWORKING AND DATACENTER:**

We solve network problems and design networking services for your company headquarters and scalable data center using the latest technology to ensure high reliability of services.
