COMPANY SUMMARY

Guardvision Monitoring BD Ltd.

GuardVision Monitoring provides security and surveillance for Guardvision's cameras in Houston, Texas. At GuardVision monitoring, our job is to keep Guardvision company's client property safe.

Over the years, companies and individuals across Houston and throughout the United States have chosen GuardVision's high-quality mobile security solutions to keep their property safe and secure. Our Guardvision Monitoring surveillance solutions are perfect for all types of companies and purposes, including construction sites, auto dealerships, and industrial sites.

While security guards can offer some protection against thieves, vandals, and uninvited guests, they can't be everywhere at once. At Guardvision monitoring, our dedicated security specialists and advanced commercial outdoor security camera systems monitor and protect your entire property at all times, both day and night.

MISSION, VISION, VALUES

MISSION

Guardvision Monitoring secures some places in USA through their own software systems. Also, proactively update their systems through software engineers.

VISION

We are actively working on more clients from different time zones. Remotely, we will provide our security systems all over the world. For that, we are working Geovision and using their support systems to make vision success.

VALUES

PROTECT WHAT MATTERS WITH BUSINESS SURVEILLANCE SYSTEMS

The security team at Guardvision Monitoring is ready to help build-out the perfect business surveillance solution. We take security very seriously. That's why we offer the best commercial surveillance solutions for industrial facilities, construction sites, home developments and more all across the Houston area that can be configured to meet unique customer requirements.

Our systems can be powered by AC or solar and multiple units can be linked together for even greater coverage. Our team engineers and manufactures each unit in-house as well as custom painting the footings and poles. Once the systems are installed, our customers can take advantage of 24/7 virtual video surveillance services or customize their needs even further with access control systems.

SECURITY CAMERA VIDEO SURVEILLANCE & MONITORING SERVICES

Here at Guardvision Monitoring, we take security very seriously. That's why we offer the best video surveillance monitoring solutions for companies, industrial facilities, private parties, and more all across the Houston area.

No matter what you need guarded, our security surveillance company will be able to help protect you, your customers, and your guests with the following security systems:

- Pole-mounted camera systems
- Mobile camera systems
- Solar security cameras
- Commercial surveillance systems

BETTER THAN LIVE GUARDS AT A FRACTION OF THE COST

Guardvision monitoring keeps watch over your property during the times that burglary and vandalism are most likely to occur. With the ability to track your camera while you are away, you can react when something or someone seems out of place. Our state of the art monitoring technology detects and analyzes data to identify humans or vehicles, then transmits a live video to the monitoring team to review. The team then actively deters theft by activating sirens, strobe lights or warning messages and will notify the property manager or police upon noticing any unwanted or suspicious activity.

DEDICATED, ON-DEMAND SECURITY CAMERA MONITORING SERVICES

Once we've gotten your business set up with the best surveillance system, our dedicated virtual security guards will monitor and watch over your company, 24/7, from a secure location. Our advanced video surveillance monitoring services will help keep your company safe with around the clock security camera monitoring services. This optional service can be added anytime for a monthly fee per camera. Live monitoring overnight means peace of mind.

Our security cameras offer a better alternative to traditional security guards and will watch over your property, business, or party the entire time you need them. Unlike security guards, our outdoor surveillance cameras will be able to track everything that's happening on your property all at once and save the footage for up to 365 days.

THE RIGHT SECURITY SOLUTION FOR YOUR INDUSTRY
