31

our software solutions

betamode focuses on developing corporate e-learning solutions. This section highlights betamode's productline.

33

our upcoming offerings

CareerHelm will be launched in 2024.

about us

Established in 2012, strategic transformation consultants (stc) quickly gained recognition in Bangladesh for its consulting and training services.

With a focus on strategy, change management, operational excellence, and project management, stc has become a trusted partner for professionals. In 2019, stc expanded its reach by incorporating in Anaheim, USA, and launching an e-learning platform. stc have also ventured into software development.

Within Bangladesh, we operate as stc bangladesh. As stc's product and service offerings grew, the broader group adopted the name stc360. stc bangladesh stands out as a leading consultancy firm, pioneering lean six sigma and project management certification programs with local expertise.

vision:

To be the trusted partner for organizations and individuals seeking to become champions of efficiency, fostering a culture of continuous improvement and driving sustainable success.

our values

consistency : continuity : competence

driven by **consistency**:

We believe in solutions that seamlessly integrate with your organization's strategic mission. We work closely to ensure our initiatives align perfectly with your long-term vision, fostering sustainable growth and efficiency gains.

committed to **continuity**:

We understand that successful transformation is a marathon, not a sprint. Continuity is key. We partner with you to develop the necessary frameworks and support systems to ensure your efficiency initiatives can be sustained and built upon over time.

empowering **competence**:

Building your team's internal expertise is paramount. We offer comprehensive training programs (including black belt, green belt, and project management certifications) so your team can confidently lead and execute transformation initiatives independently.

mission:

To empower organizations with the tools and expertise to achieve lasting operational excellence through consistent, sustainable, and competency-driven efficiency improvement initiatives.

what we do

stc learning- operational excellence learning solution

stc learning offers a range of learning solutions designed to equip individual professionals and corporate teams with the skills and knowledge to excel in strategy, change management, and other areas related to operational excellence.

PMSHuHaRI is stc360's dedicated consulting and training wing specializing in project management.

your project management power house

PMSHuHaRI- project management learning and consulting

stc global consulting- operational excellence consulting solution

stc global offers corporate management consulting services, specializing in strategy and change management. Their expertise covers a wide range of areas, including: 5S, Kaizen, total quality management (tqm), six sigma, key performance indicators (kpi), Human Resources (HR) efficiency, Operational Efficiency Improvement

stc360, the broader group encompassing stc's various offerings, has established betamode, its software and automation wing. betamode focuses on developing corporate e-learning solutions and is currently working on an organizational efficiency improvement software called FlowMotion. This highlights stc360's diversification beyond consulting and training into software development for streamlining corporate processes.

betamode- software and automation solutions

guiding the helm of your career voyage

career helm- head hunting solution

career helm caters to seasoned professionals seeking new opportunities in strategy, quality management, efficiency improvement, and project management.

stc global consulting

stc global consulting

stc global consulting has been providing consultancy solutions since 2012, from the very beginning of stc360's journey. stc's main consultancy focus is on strategy and change management. The company collaborates with corporations to enhance both manufacturing and service excellence. Key areas of focus for stc consulting include 5S rollout, kaizen for innovation drive, lean manufacturing, tqm rollout, six sigma deployment, and agile organizational efficiency.

focus on strategy & change management: At the heart of our approach lies a deep understanding of strategy development and change management. We collaborate closely with your organization to craft a roadmap for success, ensuring your initiatives gain traction and deliver lasting impact.

shaping manufacturing & organizational excellence: Our expertise spans diverse domains, where we collaborate with clients to enhance manufacturing processes utilizing methodologies such as 5S implementation, kaizen for innovation, and lean manufacturing practices. Additionally, we specialize in organizational development, offering guidance on agile practices to optimize efficiency.

Key Focus Areas:

- **5S rollout:** Establish a foundation for a clean, organized, and efficient work environment.
- **kaizen for innovation drive:** Foster a culture of continuous improvement and unlock innovative solutions.
- **lean manufacturing:** Optimize production processes to minimize waste and maximize efficiency.
- **tqm rollout:** Implement total quality management principles for consistent quality and customer satisfaction.
- **six sigma deployment:** Utilize data-driven methodologies to identify and eliminate defects.
- **organizational efficiency improvement:** Streamline processes to empower a more adaptable and engaged workforce.

stc consulting drives the organizational agility enhancement solution with scrum and kanban

We are currently providing consultancy services to ActionAid to enhance team efficiency through the implementation of Scrum and Kanban. In this project, we are organizing ActionAid's staff in Dhaka and Cox's Bazar into squads. Our work focuses on organizational change management, where team members will concentrate on their tasks while improving overall team efficiency. We are applying Scrum, Kanban, and Lean practices to achieve these goals.

The project is currently midway, with three teams having already completed the estimation phase. Over the next year, we will gradually roll out FlowMotion solutions to all employees in both Dhaka and Cox's Bazar.

stc consulting drives the review and development of Standard Operating Procedures (SOPs) and the enhancement of policies

The main objective of this process is to simplify and improve agility. We are focused on enhancing agility by streamlining Standard Operating Procedures (SOPs). Initially, we developed 60 "as-is" SOPs, which serve as a foundation for analysis. The team is now working on identifying non-value-adding activities and waste within these SOPs, aiming to improve these 60 processes through Kaizen.

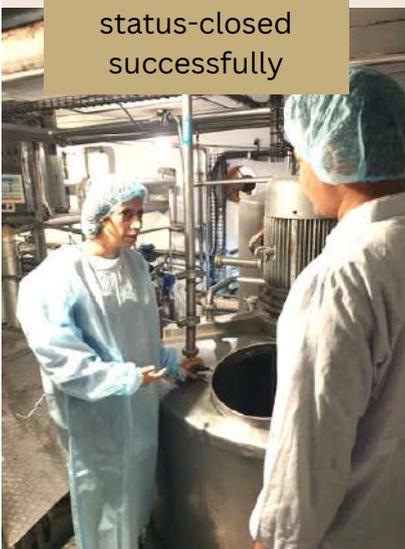

In parallel, another key aspect of this project is conducting a risk-based process analysis. This will help strengthen the internal control team by identifying potential risks within their processes and applying Failure Mode and Effect Analysis (FMEA). The goal is to foster a mindset among team members that minimizes risks.

The primary outcome of this project will be identifying risks and developing solutions through in-depth process analysis using FMEA. This will lead to the implementation of Lean Kaizen, standardization of processes, and, ultimately, enhanced agility.

stc consulting drives operational excellence at grameen danone with six sigma rollout

stc consulting successfully started implementing a six sigma methodology rollout at grameen danone, a leading bangladeshi dairy product manufacturing company. This project targeted significant areas for improvement across their production processes. Five key projects were initiated: reducing unplanned downtime, minimizing transportation damage, optimizing packing line efficiency, controlling viscosity variations, and streamlining changeover times. Our team of certified Lean six sigma master black belts (LSSMBBs) spearheaded these initiatives. The project's measure phase is complete, with baseline data collected for each project. The analyze phase will begin soon, utilizing sigma score calculations to establish initial performance metrics. This data-driven approach will empower grameen danone to pinpoint improvement opportunities and implement targeted solutions, ultimately driving operational excellence.

stc consulting drives efficiency improvements at jrc powertech through lean manufacturing

stc consulting partners with jrc powertech, a leading bangladeshi power solutions provider, to implement lean manufacturing. This initiative aims to optimize production for enhanced efficiency.

A value stream map (VSM) analysis is underway for a key product line, with standard times established within two months. Further optimization involves implementing kanban, a pull-based system minimizing waste and reacting to customer demands. stc consulting will strategically introduce other lean tools to streamline production flow and eliminate inefficiencies. In parallel, data and management information systems (MIS) will be streamlined for real-time transparency. This empowers jrc powertech with data-driven decision-making for continuous improvement.

Through this collaboration, stc consulting is committed to helping jrc powertech achieve significant efficiency gains and solidify their position within the industry.

crystal martin bangladesh ltd. drives operational excellence with lean manufacturing initiative

Crystal Martin Bangladesh Ltd., a leading ready-made garments manufacturer specializing in lingerie, initiated a lean manufacturing masterclass to enhance operational efficiency. Initially, 18 leaders received comprehensive training in lean methodologies, including 5S, kaizen, and value stream mapping. Subsequently, these leaders spearheaded the rollout of these practices, leading to the establishment of a lean line at amigo fashions, one of their garment units. Recently, 14 aspirants for the lean black belt (CLBB) certification took the mcq test, with 12 successfully passing. These certified leaders are scheduled to present their rollout status to management and a lean master black belt (LMBB). The project is ongoing, reflecting crystal martin's commitment to continuous improvement and operational excellence.

stc consulting achieves success with six sigma projects for general pharmaceuticals ltd.

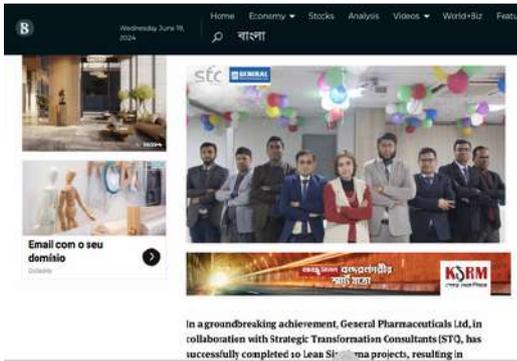

stc global consulting partnered with general pharmaceuticals ltd., bangladesh's leading pharmaceutical company, to achieve impressive results through six sigma projects. Ten black belts from stc guided the completion of ten projects, generating a cost saving of 30 million taka for general pharmaceuticals. Focusing on specific areas for improvement, the top 3 projects tackled reducing ampule rejection rates, streamlining blister machine setup times, and minimizing packing costs. This successful collaboration highlights stc consulting's expertise in implementing six sigma methodologies and their effectiveness in optimizing bangladeshi businesses.

stc global consulting drives efficiency with 5S rollout at hop yick bangladesh limited

hop yick bangladesh limited, with the guidance of stc global consulting, successfully implemented a 5S methodology across their facilities. stc divided the workplace into 12 zones and over 150 smaller circles, each assigned a specific area for improvement following the 5S principles (sort, set in order, shine, standardize, sustain). Through two rounds of this innovative rollout, stc established a customized 5S standard for hop yick. Transparency and collaboration were fostered throughout the process. Zones were evaluated through audits and assigned numbers. Zonal leaders participated in meetings where the best projects were chosen through voting. This approach ensured a successful and team-driven implementation of the 5S methodology.

stc global consulting drives efficiency at apex lingerie with first-of-its-kind 5S training videos

stc global consulting successfully implemented the 5S methodology at apex lingerie, a garment manufacturing company in dhaka. This was the first time stc created training videos specifically for 5S and Kaizen. The project involved training over 4,000 garment workers and overseeing the complete 5S rollout at apex lingerie. stc started 5S standard preparation and audit for this organization.

smc enterprise achieves over 50 million taka savings with kaizen rollout by stc global consulting

SMC Enterprise partnered with stc global consulting in a multi-phased project to implement kaizen, a continuous improvement philosophy, across its organization. The initial rollout in 2019 targeted two factories in valuka and cumilla, resulting in 20 million taka savings through 40 kaizen projects. The success led to further collaborations, extending kaizen to regional offices and culminating in a company-wide rollout by 2022. This comprehensive approach delivered another 30 million taka saving reported by the cumilla factory alone. With the project's successful completion, smc enterprise has achieved over 50 million taka in cumulative savings through stc's expertise in kaizen implementation.

walton hi-tech industries achieves 20 million taka savings through lean six sigma with stc

Walton Hi-Tech Industries partnered with stc global consulting in 2018 to implement lean six sigma, a methodology for process improvement.

The project included:

- Training on 5S, kaizen, and six sigma by an stc master black belt for 50 participants.
- Initiation of 10 six sigma projects.
- Selection of 10 black belts from the trained participants.

The successful outcome yielded:

- Savings of 20 million taka.
- Development of a new silent fan model based on a project to reduce ceiling fan noise.

evergreen products soars efficiency with lean manufacturing by stc global

Evergreen Product Factories launched their lean manufacturing journey in 2017 with stc global consulting. Within a year, the collaboration yielded significant results:

- Over 50 virtual production lines were established across various units in nilphamari.
- Implementation of core Lean principles: 5S, kaizen, value stream mapping, and standardized 5S audits.

This comprehensive approach led to a 15% efficiency increase within the first year, with further improvements expected. Evergreen's success story highlights the power of lean manufacturing for optimizing production and achieving lasting results.

aci logistics (swapno) streamlines processes and reduces complaints

ACI Logistics (Swapno) partnered with stc global consulting in 2014 to address process inefficiencies and optimize operations. The project focused on:

- Identifying root causes of customer complaints: Client complaints were analyzed using pareto charts to pinpoint the most frequent issues.
- Risk-based process analysis: Based on management feedback, stc employed failure mode and effect analysis (FMEA) to identify potential risks and their impact.
- Targeted improvement: The project specifically aimed to reduce complaints related to dry vegetables and enhance sales representatives' knowledge.

stc delivered a comprehensive analysis with documented findings and recommendations to empower aci logistics in implementing targeted improvements for a more streamlined and customer-centric operation.

digital engravers limited doubles production with lean & tqm by stc global consulting

Digital Engravers Limited (DEL) embarked on a two-phase journey towards operational excellence with stc global consulting.

Phase 1 (2012):

- Process mapping: SIPOC and FMEA identified improvement opportunities.
- Lean implementation: "Cellular Manufacturing" project at the base section increased average production from 37 to 55 units.
- Leadership development: Leaders received training to support continuous improvement.
- 5S rollout: Standardized work practices were implemented.
- six sigma foundation: Measurement System Analysis laid the groundwork for further improvement.

Phase 2 (2014):

- Total Quality Management (TQM) and kaizen rollout: Over 20 circle leaders were trained on utilizing 7QC tools for continuous improvement.
- Empowered workforce: DEL's team is now equipped to independently lead and implement tqm projects.

Through this successful partnership, DEL achieved significant improvements in production efficiency and empowered its workforce for ongoing optimization.

our clients speak for us!

“The last two days of training were a real boost for me. While we’ve been practicing in our factory, I learned key concepts like 5S, which I’ve already started applying at the office. Today’s class was on a whole new level, where we worked on team coordination, work balance, and time management while making a crocodile. These terms have made our work much easier. The training was extremely beneficial, and I’m excited for the next classes!”

Separate

PMSHuHaRi, the global project management solution provider, was started in 2012 with the vision of providing master level project management training, mentoring, and coaching worldwide.

Since our inception, we are providing integrated project management solutions through rigorous multidisciplinary global expertise.

PMSHuHaRI consulting

Every organization approaches project management differently. PMSHuHaRI Consulting recognizes this diversity and tailors solutions to fit your specific goals. Whether you're seeking initial guidance or comprehensive support, we're here to help you achieve project success.

Our Services:

- **Project Management Maturity Assessment:** Gain a clear understanding of your organization's current project management practices. We identify areas of strength and opportunities for improvement, helping you develop a roadmap for achieving greater efficiency and effectiveness.
- **PMO Setup & Optimization:** Establish a Project Management Office (PMO) that aligns perfectly with your needs. We guide you through the entire process, from defining PMO functions to establishing processes and procedures. If you have an existing PMO, we can help optimize its performance for maximum impact.
- **Project Management Consulting (PMC):** Benefit from our team's extensive experience. We provide comprehensive support throughout the project lifecycle, from planning and execution to risk management and successful project closure.
- **PMO Outsourcing for Efficiency:** Not every project requires a full-time, dedicated PMO. PMSHuHaRI Consulting understands that. We offer a cost-effective alternative: part-time PMO outsourcing. This solution allows you to leverage the expertise of our PMO team on a flexible, as-needed basis.

Here's how it benefits you:

- **Cost-Effectiveness:** Avoid the overhead of a full-time PMO by engaging our team only when required.
- **Scalability:** Scale your PMO support seamlessly based on project needs. You can increase or decrease the level of support as your project portfolio evolves.
- **Expertise on Demand:** Tap into the knowledge and experience of our team to ensure your projects are executed efficiently and meet their goals.

PMO outsourcing is ideal for Organizations with a small to medium-sized project portfolio, Situations requiring temporary support for specific projects.

stc 360 learning solutions

STC360 Learning empowers individuals and organizations to achieve operational excellence through a comprehensive range of training programs. Backed by the expertise of stc and PMSHuHaRi learning solution, we offer a unique blend of in-person and online learning solutions, catering to both corporate teams and individual professionals.

stc learning key focus areas:

Strategic Planning & Performance Management: Develop expertise in strategy formulation, key performance indicators (KPIs), and aligning operational activities with long-term goals.

Efficiency Improvement: Hone your skills in methodologies like 5S, Kaizen, Lean Six Sigma, and Total Quality Management (TQM). Learn to optimize processes, eliminate waste, and drive continuous improvement.

Supply Chain & Inventory Planning: Gain a comprehensive understanding of supply chain management principles, including forecasting, inventory optimization, and logistics planning. Learn to streamline your supply chain for efficiency, reduced costs, and improved customer service.

pmsuhari learning key focus areas:

Traditional Project Management: PMSHuHaRi Learning empowers you to excel in project delivery, offering comprehensive training solutions for methods like Waterfall. enabling participants to gain the skills to meticulously plan, execute, and control projects, ensuring predictable and successful outcomes.

Agile Project Management: Dive into the dynamic world of Agile frameworks like Scrum with PMSHuHaRi Learning. Our comprehensive training empowers you to adapt to evolving requirements and deliver value faster through iterative approaches. Learn to navigate change and embrace flexibility for successful project outcomes.

flexible learning options

We understand that learning styles and professional needs vary. That's why we offer a variety of training formats:

Public training is ideal for experienced professionals seeking to expand their skillset. Anyone can join any program that aligns with their career goals, regardless of current affiliation. Public batches are frequently arranged for industry-recognized certifications, such as PMP® Exam Prep, Lean Six Sigma Certification, and Supply Chain & Inventory Planning Certification. Participants gain valuable knowledge and network with peers from diverse backgrounds.

Corporate Workshops: Corporate in-house training empowers your organization to develop a highly skilled workforce tailored to your specific needs. Unlike public training, programs are designed to address your unique challenges and strategic goals. This targeted approach ensures employees gain the exact skills and knowledge required for success, fostering a common understanding across teams that leads to smoother collaboration and ultimately, increased efficiency in achieving your organizational objectives.

E-learning with stcwebclass and pmebclass: STC360 offers e-learning solutions that empower seasoned corporate professionals to fit professional development into their busy schedules, while still gaining valuable knowledge and skills relevant to their career goals. STC360 Webclass platforms provide a convenient and cost-effective solution for individual development. Learners progress at their own pace with self-paced video tutorials. Additionally, assignments and quizzes are incorporated into these solutions to enhance knowledge retention and skill application.

SOFTWARE AND AUTOMATION

stc360, the broader group encompassing stc's various offerings, has established betamode, its software and automation wing. BetaMode, a dedicated wing focused on developing, refining, and commercializing software products for the global market. This initiative allows STC to innovate rapidly, introducing cutting-edge solutions while also testing new concepts internally before full-scale market release. With a strategic focus on corporate solutions, BetaMode aligns with the company's vision of leveraging digital transformation for business optimization.

New products

Webclass- The enterprise wide e-learning solution

Initially designed for internal use under the banner of STClearning, this enterprise-wide e-learning solution is now offered to external clients. Organizations can deploy it as a private learning platform for employees. It integrates WebClass products for seamless training delivery. In 2024, Link3 Technologies became the first corporate client to adopt this solution.

PMDeepDive: Exam Simulator

This advanced exam simulator is designed for organizations involved in exam preparation. It features a powerful dashboard that allows students to track their progress and improve performance. DeepDive is ideal for education providers seeking a comprehensive evaluation tool.

FlowMotion-The Organizational Efficiency Improvement solution

Tested internally since 2019, FlowMotion gives companies real-time visibility into employee efficiency. The solution helps organizations monitor workforce productivity and optimize performance. ActionAid Bangladesh, a renowned INGO, became its first client in 2024.

CRM Corp - Customer relationship management

Currently in its internal testing phase, this customer relationship management (CRM) solution enables enterprises to track and manage their interactions with customers. It aims to streamline communication, improve customer satisfaction, and foster long-term relationships.

stc360 Upcoming products in 2025

career helm- head hunting
solution

CAREERHELM

STC360 is entering the headhunting sector, utilizing its extensive network of over 5,000 corporate professionals and 200+ corporate partners. This initiative aims to bridge the gap between the demand and supply of skilled professionals in project management and operational excellence. By connecting top-tier talent with organizations seeking specialized expertise, STC360 is well-positioned to address the growing needs of industries looking for leadership in these areas.
