COMPANY OVERVIEW

Defosco Limited is a leading multi-sector solutions provider headquartered in Bangladesh, delivering innovative technology and business solutions to enterprises, government organizations, and institutions. With a strong commitment to quality, innovation, and customer success, we help organizations transform their operations through integrated solutions that enhance efficiency, security, and sustainable growth.

We specialize in end-to-end **IT Infrastructure, Software Development, Cybersecurity, Industrial Automation, Cloud & Managed Services, and Digital Transformation**, complemented by expertise in **Trade, Logistics, Corporate Support Services, and Event Management**. Our multidisciplinary capabilities enable us to deliver comprehensive, scalable, and future-ready solutions tailored to the unique requirements of each client.

Founded in **December 2023**, Defosco Limited began its journey with a strong focus on research-driven innovation, developing advanced solutions to address complex business and technological challenges. Over the years, we have grown into a trusted partner for organizations seeking reliable, efficient, and value-driven services across multiple sectors.

Our approach is built on precision, transparency, integrity, and long-term partnerships. By combining technical excellence with deep industry knowledge, we empower our clients to improve operational performance, strengthen security, optimize resources, and embrace digital transformation with confidence.

Today, Defosco Limited continues to expand its capabilities and market presence while remaining committed to delivering excellence, fostering innovation, and creating sustainable value for customers both in Bangladesh and beyond.

OUR MISSION & VISION

Our Mission:

To be a globally recognized and trusted technology and business solutions partner, driving digital transformation and operational excellence through innovation, integrity, and sustainable value creation. We aspire to empower organizations with future-ready solutions that contribute to economic growth, technological advancement, and a smarter, more connected world.

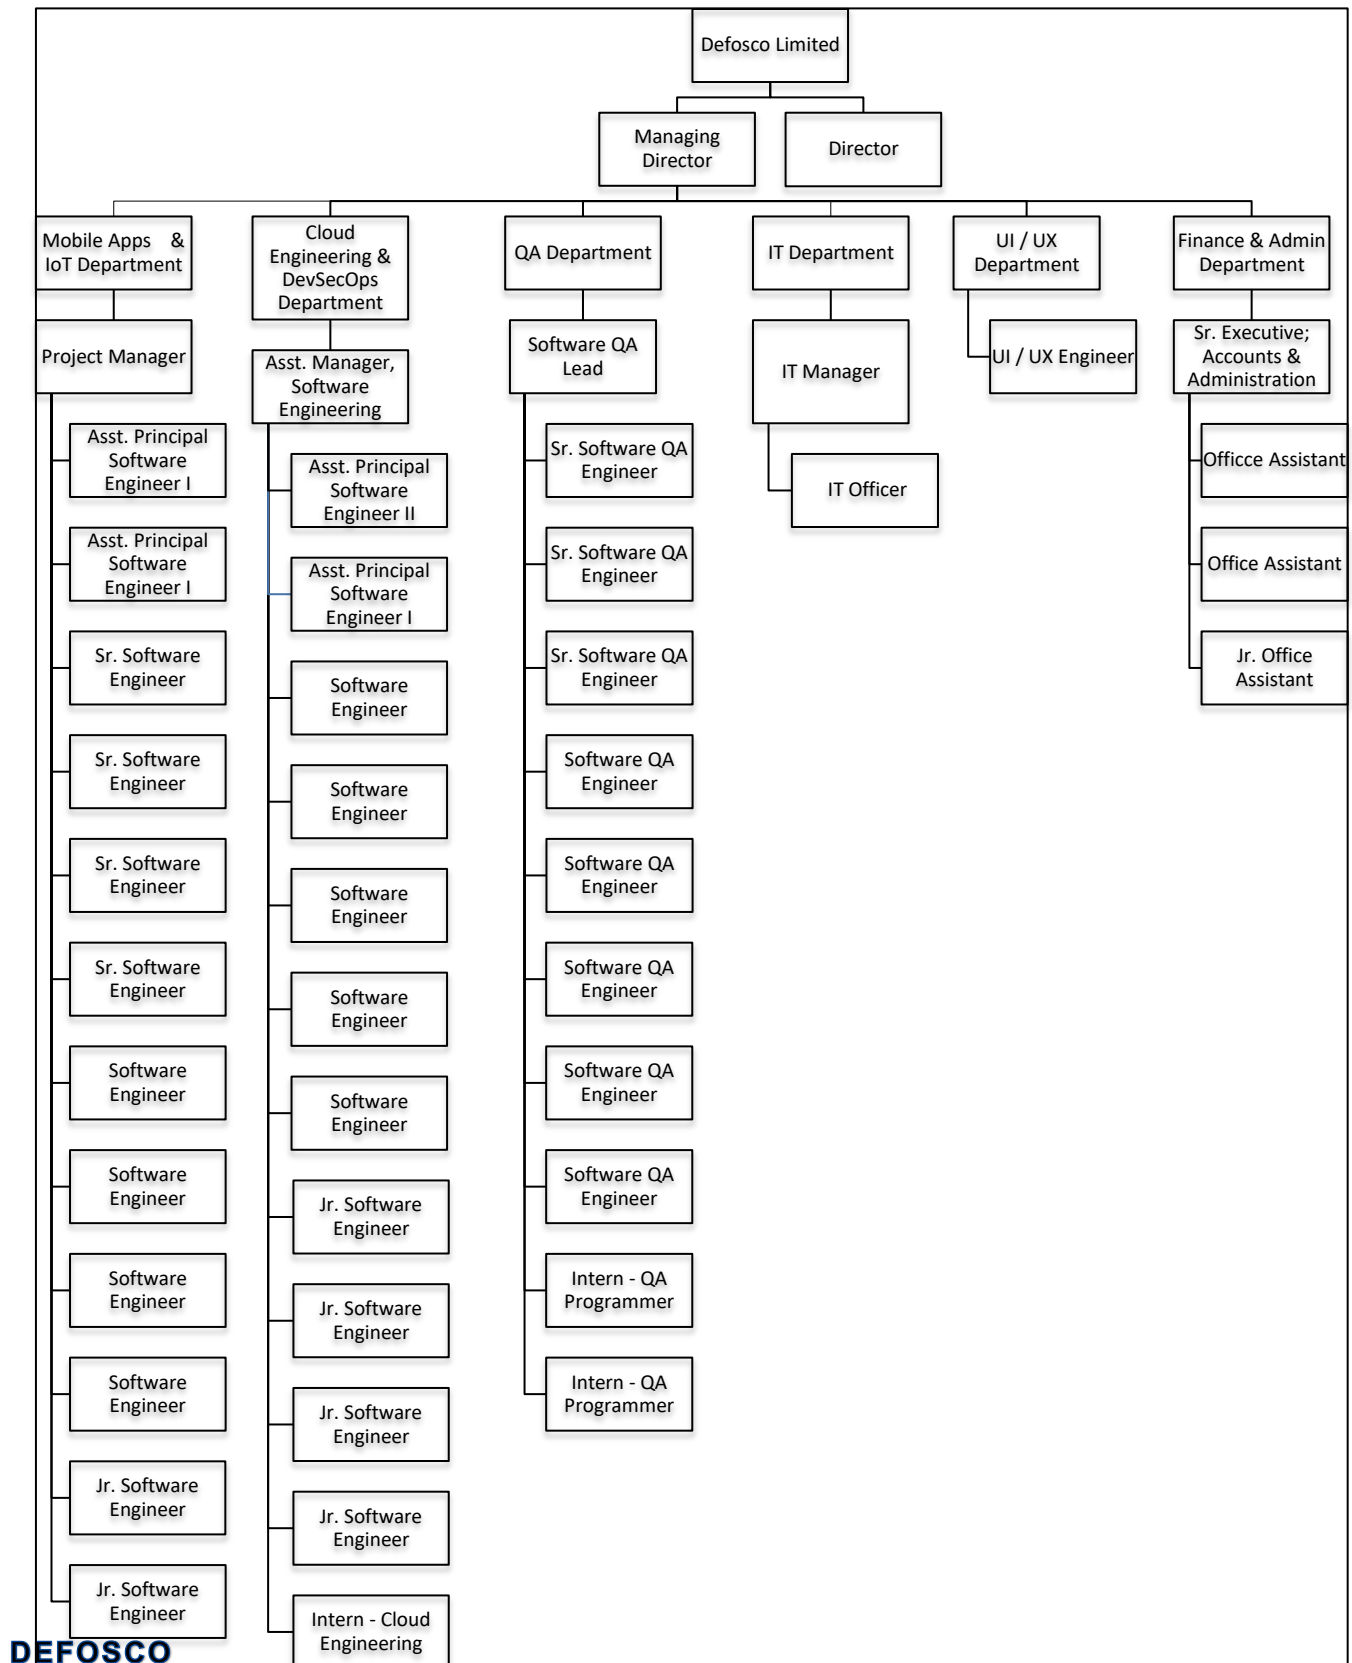

Our Vision:

- To deliver innovative, reliable, and high-quality technology and business solutions that address the evolving needs of our clients.
- To empower organizations through advanced IT infrastructure, software development, cybersecurity, automation, and digital transformation services.
- To build long-term partnerships by maintaining the highest standards of professionalism, transparency, and customer satisfaction.
- To foster a culture of continuous learning, innovation, and operational excellence that enables sustainable growth for our clients, employees, and stakeholders.
- To contribute to the development of businesses and industries by providing scalable, efficient, and value-driven solutions that create lasting impact.

GENERAL INFORMATION

Company Registered Name		DEFOSCO LIMITED
Company Registration Number		C-207353/2026
Date of Incorporation		January 01, 2026
Type of Organization		Private Limited Company
Type of Business		Software Development & IT Services, Importer & Exporter
Company Registered Address		73, Kakrail Eastern Commercial Complex, Suite # 8/05, Level # 09, Kakrail, Ramna, Dhaka-1217
Operational Address		House # 20, Level # 8 & 10, Shahjalal Avenue, Sector # 4, Uttara, Dhaka-1230
Telephone: +88 02 8933139/42, 41090191/2		Mobile: +8801796742128
E-mail: info@defosco.com		Web site: www.defosco.com
Board of Directors	Managing Director	Nahid Hossain
	Director	Md Rashed Ul Haque Sarker

COMPANY ORGANOGRAM

DEFOSCO

OUR CAPABILITIES

Defosco is a Full-Stack Development Company & one-stop shop for firmware, apps, cloud solutions and DevSecOps. Our expert developers provide the optimum and customized solutions tailored to the specific business needs of its clients. The key sectors are:

- **Developing Satellite Communication Solution for Business Aviation.**
- **Providing Cyber Security Solutions & Services for any Industry.**
- **Developing Cutting Edge Technology Solutions that drive Business Results.**
- **Developing Highly Secure Solutions for Defense & Government.**
- **Developing HIPAA Compliant Solutions for Healthcare Industry.**
- **Expert in Converged Communication Technologies.**
- **Software Development Expertise in Industry 4.0**

Full-Stack Capabilities are:

■ SATCOM SOFTWARE:

Converged & Secure Communication Solution over Satellite Network for Aviation, Marine, Government, Defense, Oil & Gas Industry.

■ IoT SOLUTIONS:

IoT Apps, Industrial IoT Systems, Back-end Infrastructure, Data Warehousing & Analytics, Converting Analog to Digital.

■ IP TELEPHONY & LEGACY:

VoIP, FoIP, Secure Voice & Messaging, SS7, ISDN, CEPT-E1, VoIP Apps, Voice over Satellite, Cloud VoIP, IP PBX, IP Call Center.

■ AI & Machine Learning:

Business Intelligence, ML / DL, Cloud IoT, NLP, Voice Recognition, Image Processing & Video Analytics, Chatbots, Computer Vision.

■ MOBILE & SMART TV APPS:

Enterprise Mobile Apps (iOS, Android, Cross Platform), Smart TV Apps, Smart Devices & Wearables, VoIP/IM Apps, Cloud Apps.

■ CLOUD SOLUTIONS:

IoT Cloud Solutions, Cloud Infrastructure Optimization, Cloud Integration, Cloud Deployment Service, Migration to Cloud.

■ FINTECH & BLOCKCHAIN:

Cryptocurrency, Hyperledger, Customized Blockchain Development for FinTech, Healthcare, Aviation, Manufacturing.

DEFOSCO

■ DevOps & CYBER SECURITY:

Analysis & Evaluation, Automation & Configuration, Maintenance & Support, Cyber Security Assessment to Implementation.

OUR SERVICES

➤ Custom Software Development:

From mobile consumer apps and line-of-business corporate web solutions to system level desktop utilities and large-scale corporate IT systems, we can bring to life any software idea you may have.

- **Web Solutions:** At Defosco, we create both standalone web solutions and multi-level system parts that help companies efficiently deal with operational and technological challenges.
- **Mobile Solutions:** We design and develop all types of mobile custom software development solutions - complex mobile apps for any platform, mobile SDKs and utilities, lean mobile business solutions smoothly integrated with web services and internal corporate systems.
- **Cloud Software:** We do all things cloud-related: build scalable solutions of any complexity, customize and configure cloud solutions according to your business processes, design and construct cloud infrastructures, migrate legacy IT systems, support, and maintain existing cloud apps.
- **Desktop Development:** Our desktop development expertise spans a wide spectrum of areas: hardware or OS-specific desktop applications, standalone or web-enabled apps; utility or plug-in solutions.

➤ Embedded System Development:

Defosco engineers complex embedded systems that combine hardware and user interfaces with powerful software, connectivity and proximity technologies. We cover the full embedded systems development cycle: from product strategy, design and system development to implementing embedded integrations, testing, and user experience.

- Whether you are looking for embedded solutions to connect devices within an IoT system, remotely control devices and equipment, or gather and process sensor data, our embedded engineers can help.
- Our team will help you streamline data exchange and interaction between the operating system and disparate software modules and databases. We know how to make network services, hardware components, and user apps work together.
- As part of our embedded systems development service, we help businesses optimize the performance of their consumer and industrial IoT solutions, efficiently manage workflows, enhance the security of their data, and get advanced reporting mechanisms.
- We design and develop hardware components and apps that enable secure data exchange over a reliable connection that lasts. This applies both to IoT systems and the connected devices.

➤ **Business Analysis & IT Consulting Services:**

As part of our Business Analysis (BA) services, we help clients launch IT solutions on time, on budget, and up to specification. To that end, the Defosco BA team studies your business needs, goals, and objectives, and works in tandem with our developers through the entire project cycle. Through this process we:

- Analyze how the system would function (non-functional requirements)
- Narrow down the project scope
- Choose the optimum technology stack
- Plan the solution architecture
- Create an implementation roadmap
- Document solution requirements
- Provide a detailed cost estimation

➤ **DevOps Development and Consulting Services:**

As an established DevOps services company, Defosco will help your business, development, and operations teams stay on the same page about the optimal way to upgrade enterprise apps, improve IT security, and utilize infrastructure resources. The process covers:

- The segmentation of bulky enterprise apps into self-sustained services
- IT infrastructure migration to the cloud
- Prompt bug discovery and fixing
- The deployment of new features with little risk and human involvement

➤ **Cyber Security Services:**

Defosco has devised a set of analytical, testing, and consulting practices to help enterprises undergoing Digital Transformation. We review their existing code base, fix bugs, introduce new layers of security to repel hacker attacks, and educate employees on cybersecurity. The process includes:

- Code and documentation review
- Compliance assessment (HIPAA, HL7, FDA, PCI DSS, GDPR, FedRAMP)
- Cybersecurity consulting
- Firewall configuration analysis
- Evaluating your employees' adherence to your corporate security policy and best practices

➤ **IT Quality Assurance Services:**

With multidisciplinary QA capabilities at hand, we make sure the solutions built by our team or 3rd-party vendor function as expected, are convenient to use, and scale flexibly along with your business. We have custom processes for testing apps, devices, and IoT systems. The process includes:

- **Embedded Software Testing:** We test the embedded systems powering your custom device: bare metal firmware, digital signal processing (DSP) solutions, device drivers, SDKs, and AI-based middleware. Our firmware QA lab will look into the source code, run emulations, and test the embedded software on the actual device to make sure it works correctly.
- **Mobile Application Testing:** We validate that your mobile app (native, cross-platform) or progressive web application (PWA) performs well on target devices and meets usability requirements.
- **Desktop & Web Application Testing:** While testing a web or desktop application, we check whether it loads quickly, handles traffic surges, and provides adequate output to user requests.
- **IoT Testing:** When testing IoT solutions, we focus on their ability to collect, exchange, and encrypt data, and provide the desired user experience. We also check connected systems against common faults leading to security breaches, such as hard-coded device passwords and failed firmware updates.

WE BUILD SOLUTION FOR

- SATCOM Service Providers
- Government & Defense
- Aviation
- Marine
- Oil & Gas
- Aircraft Manufacturer & OEMs
- Wireline & Wireless Service Providers
- Hardware Manufacturer / OEMs
- Automotive
- Banking, Finance & Insurance
- Carrier & Telecom Operators
- Non-Profit & Social Business
- Healthcare
- Agriculture Sector

CLIENTS SERVED

Fortune 500 enterprises and world-class brands trust our custom software development solutions. Our team members have the distinguished experience and association with different national and international organizations in different sectors. Defosco has several clients using its array of products and we serve 42+ countries. A partial list of these clients includes:

WHY USE DEFOSCO SOLUTION

Our solid background, flexibility and full transparency enabled us to become a trusted technological partner for our clients. Defosco is synonymous with top quality and high-end products & services.

Our deep bench of talented developers (23+ experienced engineers) and project managers will analyze your challenges, diagnose success blockers, craft a comprehensive strategic product plan, and help you develop a fully-customized software solution designed to streamline efficiencies, cut costs, boost client engagement, and more.

Our Advantages are:

- **Technical Partners:** We rely on the specific business needs of our clients and support them throughout the whole way: from an idea to its implementation.
- **Agile Approach:** We follow best PM practices & processes like Agile methodology using Scrum and Kanban that allow us complete projects on time and budget.

DEFOSCO

- **Secure & Quality:** Our Senior Developers and CTO always participate in the Code Review process regardless of the project size to ensure code quality.
- **Full Transparency:** We use our own Redmine as project management system or Customer's own project management system to provide real-time project updates and engineer's involvement with their progress.
- **Easy Communication & Personal Assistance:** Constant contact with project managers and full transparency help to quickly resolve emerging issues and make decisions.
- **Post-release Support:** After the project is completed, we help develop it further and are always ready to provide assistance. We promptly respond to any questions from, and provide comprehensive support to, our customers.
